Amplify 2026

November 2-5 Scottsdale, AZ

Step Back to Move Forward: Data Readiness for AI

November 3

Wolters Kluwer

ELM Solutions

Speakers

Amy Choe
Head of Professional Services
Practice Management
Wolters Kluwer ELM

Kamelia Oneth
Vice President –
Legal Operations
CoBank

Suresh Pillai
Associate Director,
Legal Business Solutions
AbbVie

Mike Stein
Director, Legal &
Compliance Operations
QVC, Inc.

A practical readiness framework

1. **UNDERSTAND:** Know what you have and why it matters
2. **CURATE:** Reduce noise; improve relevance and structure
3. **GOVERN + CONNECT:** Assign ownership and make data usable

Today’s conversation

Four questions frame the panel discussion.

01 **Why teams step back**

02 **What the data reveals**

03 **How teams simplify and improve**

04 **What makes readiness sustainable**

Three lenses for the panel discussion

1

Data you have

Inventory, sources, history and hidden assumptions

2

Data you trust

Definitions, quality, context and accountable ownership

3

Data you use

Workflow fit, access, adoption and measurable outcomes

Readiness improves when all three lenses reinforce one another.

Move forward with purpose

1. **Start with the decision**

   Define the workflow, user, and outcome before selecting data or technology.

2. **Simplify before you automate**

   Remove low-value content, standardize what matters, and preserve necessary context.

3. **Make readiness an operating habit**

   Assign ownership, measure use, and create feedback loops that improve data over time.
